

Meeting Agenda

Date: 31/3

Participants: Everyone

1. Objectives (5 min). Resolve any issues preventing the team to continue.

We still need to create a maven-project in JMonkeyEngine.

2. Reports (15 min) from previous meeting

Everyone have been watching all tutorials that we decided to watch. All use cases have been done. Our sketch of the GUI is done.

3. Discussion items (35 min)

- Maven
- Maven project
- Use Cases

4. Outcomes and assignments (5 min)

We should start with the sequence diagram before the next meeting after the break.
Everyone should continue watching tutorials for jMonkey Engine. We should also create a project and start coding.

Alexander should try to create a maven project so we can start coding.
Anton should start to look up how collision works in jME so he can start with that when we create a project.

Johan should start with the sequence diagram.

Rasmus should fix his maven problems he got on his mac.

5. Wrap up

24/4, "underjordssalarna"
